PROFESSIONAL SUMMARY

Computer Science undergraduate at Saigon International University who ships working software: a Flask dispatch platform in daily use by a 36-vehicle trucking fleet, an on-device Android disease classifier, and a FastAPI robotics controller. Comfortable from process analysis and requirements gathering through to deployed, tested code. Eight years of study in the United States and English teaching experience (IELTS 7.0) give me clear documentation and cross-cultural communication.

TECHNICAL SKILLS

Programming Languages	Python, Java, JavaScript, C++, SQL
Frameworks & Libraries	Flask, FastAPI, React, PyTorch, Node.js, pandas
Tools & Platforms	Git, Docker, SQLite, MySQL, pytest, Leaflet, Three.js, Render, Linux
Languages	Vietnamese (native), English (fluent, IELTS 7.0)

PROJECTS

Fleet Logistics Platform

github.com/KhoaNguyen01004/ThanhTrungApp

Tech Stack: Python, Flask, SQLite, JavaScript, Leaflet, Three.js, pytest, Render

- Built and deployed a 7-module dispatch platform used daily for a 36-vehicle trucking fleet — GPS tracking, geofencing, delivery planning, photo proof of delivery — over 130 REST endpoints.
- Added a 3D truck-load planner (bin packing with stacking and door-access rules) and a defensive Google Sheets plan importer.

AgriLens — Plant Disease Detection

github.com/KhoaNguyen01004/PlantDiseaseDetectionProject

Tech Stack: PyTorch, EfficientNet-B2, TorchScript, ONNX/TFLite, Android, CameraX

- Trained a 39-class leaf-disease classifier, fine-tuned on field photos with macro-F1 checkpoint selection.
- Shipped on-device inference in a bilingual Android app via TorchScript, with Grad-CAM explainability in the offline pipeline.

Color-Sorting Robotic Arm Controller

github.com/KhoaNguyen01004/color-sorting-robotic-arm-controller

Tech Stack: FastAPI, React (Vite), OpenCV, pySerial, Arduino

- Built a FastAPI backend owning joint limits, the serial protocol, and the sort state machine for a 6-axis arm, plus a simulation mode that runs the full flow without hardware.
- Built a React control panel with keyboard and slider jogging, live state polling, and emergency stop.

EXPERIENCE

Logistics & Systems Analysis Intern

Jun 2026 – Sep 2026

Thanh Trung Trading Services & Investment JSC (TT Ex-Trans) — Ho Chi Minh City

- Mapped fleet allocation, driver scheduling, and delivery tracking into documented software requirements.
- Gathered requirements from dispatchers and drivers to specify fleet, fuel, and maintenance features.
- Reconciled delivery and fuel cost records against operational logs, improving reporting accuracy.

English Teacher

Feb 2021 – Jun 2021

Washington English Center

- Taught mixed-level adult learners, breaking complex material into clear, sequenced explanations.
- Adapted delivery for varied language backgrounds and coordinated curriculum with fellow instructors.

EDUCATION

Saigon International University (SIU)

Expected 2027

Bachelor of Computer Science — Ho Chi Minh City, Vietnam

Montgomery College

2020 – 2022

Associate of Arts — Maryland, United States

CERTIFICATIONS

IELTS — Band 7.0 Overall (20 December 2023)
